

The Best Built Enclosures

Bassworx prides itself on engineering enclosures that satisfy your hunger for bass. Whether you're considering a basic sealed or ported model, or stepping into our woofer specific solutions, all our enclosures are built to deliver peak performance from your subwoofer system.

Quality craftsmanship, high-tech woodworking equipment, and years of engineering and manufacturing experience ensures every enclosure is built right. Bassworx enclosures are machined with precision accuracy, utilizing the latest in CNC automated fabrication. All models benefit from rabbet and dado assembly to maximize strength and ensure an air-tight seal along every joint.

Countless hours are spent in the design phase to deliver an enclosure you'll be proud to own. No expense is spared and no corner is cut to manufacturer each and every enclosure. When you purchase a Bassworx enclosure, you are getting the best!
